601L 600 Series Quad Door Refrigerator Freezer, Ice & Water, Plumbed, In-door

600 Series

Satina | French hinge

With filtered water and ice both available through the door, this large capacity model is the height of convenience, including two adjustable temperature areas within the fridge and the freezer – SwitchZone™ and My Zone – so you can create ideal conditions for different foods.

- Plumbed-in water and an Absolute Ice maker, both distributed through the door
- SwitchZone™ compartment lets you change the temperature between -18°C to +5°C
- My Zone adjustable temperature drawer plus Humidity Zone drawer
- Advanced Anti-Bacterial Treatment (ABT) technology reduces bacteria* in the air
- Wi-Fi connected for remote control and helpful alerts using the SmartHQ™ app

DIMENSIONS

Height	**1775 mm**
Width	**908 mm**
Depth	**750 mm**

FEATURES & BENEFITS

Designed To Impress

Approach your fridge and the plumbed water and ice dispenser will illuminate with a soft, diffused light, making it simple to pour chilled, filtered water any time of day. Choose from a black or Satina finish, with refined design to suit any modern kitchen. Full back-panel LED lighting provides a clear view of the whole interior. This Quad Door fridge is designed for flexibility of storage, and performance.

Pure Ice And Water

Experience purer ice, untouched by fridge air or odours thanks to Haier's Absolute Ice technology. Cold air from the evaporator goes directly to the triple cooling system, which turns filtered water into ice without any chance of cross-contamination resulting in a 10x improvement in the purity of the ice*. Whenever you need ice, simply select your ice type and it dispenses directly from the exterior door. With up to 1.4kg of ice made each day, you always have ice at your fingertips.

*Independently tested to improve trimethylamine content by x10 using absolute ice technology compared to the ice maker in model CVE28DP2NS1

Switchzone™ Flexibility

When you need extra space, SwitchZone™ lets you change the bottom right compartment to fridge or freezer. Change it back just as easily, or select any temperature between -18°C to +5°C.

Anti-Bacterial Treatment (ABT) protection

Air is circulated through an advanced ABT filter that kills up to 99.9% of bacteria,* helping to ensure a fresh and hygienic storage environment for your food.

*Independently tested to remove greater than 99.99% of Staphylococcus aureus, Escherichia coli, Listeria monocytogenes, Salmonella aertrycke, Shigella sonnet and Yersinia enterocolitica.

Lock In Freshness

A My Zone adjustable temperature drawer has three settings – use it for fruit and vegetables, to store meat or seafood at their ideal temperature, or when you need extra storage for drinks. In the other drawer, Humidity Zone offers the ideal humidity-controlled conditions to store your fresh fruit and vegetables.

Even Cooling With Multi-Zone Air

An ideal food storage environment is created with the help of Multi-Zone Air, which evenly circulates cool air to every corner of your fridge, maintaining a stable temperature even when the door is opened.

Wi-Fi Enabled

With Wi-Fi connectivity you can control your fridge through smart home speakers or your SmartHQ™ app. Change the setting of your SwitchZone™ compartment from fridge to freezer, get an alert when your water filter needs changing, turn on your ice maker to get ready for guests, and more.
