FEATURES & BENEFITS

Slimline design made to fit

At just 507mm deep, this slimline washer fits easily under countertops or within shallow cabinetry, ideal for apartments and smaller laundries. With a 7.5kg capacity, it offers ample space for everyday washing and delivers efficient performance you can rely on.

Fast cycles for busy lives

When life gets busy, the Express 15 cycle is designed for quick refreshes and smaller loads, helping you stay on top of laundry even on busy days. Add a Garment makes it easy to include anything you've missed, while everyday wash programs take care of the rest.

Refresh and renew with steam

Keep clothes and linens smooth and fresh with the convenient Refresh cycle. Perfect for lightly worn garments or stored items, it uses steam to help gently reduce odours and creases while using minimal water and energy.

Save on energy and water

When using the Eco wash option with your Cotton cycle, energy use is as low as 44% of a standard wash, saving more than 25 litres of water each load. It's an easy way to care for your clothes while being kind to the environment.

15 specialised wash cycles

Choose from 15 wash cycles designed to care for everything from everyday loads to delicate fabrics, helping keep clothes looking their best.

Care for your machine

Anti-Bacteria Treatment (ABT) in the door gasket helps keep your laundry environment hygienic. The Drum Clean cycle uses hot water and high-speed spinning to help remove detergent residue and keep your washer fresh.

The world's #1 home appliance brand*

Haier is the world’s number one Major Appliance brand*, and has been for 16 years running. With our global network, trusted technology and local expertise, Haier is a name you can rely on. *Source: Euromonitor International Limited; Consumer Appliances 2025ed, % unit share, 2024 volume sales data. Major Appliances category is the sum of dishwashers, home laundry appliances, large cooking appliances, microwaves and refrigeration appliances. Volume sales refer to sales in retail and construction channels.
