DUCTED AIR CONDITIONING SYSTEM

Smart Power

Haier's Smart Power ducted air conditioning systems provide an effective whole-of-home heating and cooling solution. Also suitable for commercial spaces, the system is made up of:

- an outdoor unit in a suitable location
- an indoor unit, often located out of view in the ceiling
- flexible ductwork to deliver airflow to multiple rooms through discreet vents
- a controller that is used to control the whole air conditioning system.

To suit all kinds of installation requirements, we offer three types of indoor unit:

- High static ducted
- Low profile ducted
- Round way cassette.

Zone control

For control over the airflow to individual rooms, Haier offers an optional SmartZone controller.

With up to eight controllable zones, SmartZone lets you turn the airflow on or off to rooms depending on how they are used, minimising unnecessary heating or cooling for improved efficiency.

With SmartZone installed, air conditioning is switched on for only the three occupied rooms.

SMART POWER OUTDOOR

With a 180° sine wave DC inverter, the Smart Power outdoor unit is designed for quiet and efficient operation, paired with an indoor unit to suit the installation.

FEATURES AND BENEFITS

Wi-Fi connectivity

It is simple to make the Haier Smart Power System Wi-Fi compatible. Purchase the additional accessory (KZW-W003) and connect it to the indoor unit and your internet via your Wi-Fi router. Then you can control your Haier system wherever you are by smart phone or tablet.

Download the Haier SmartHQ™ app, free from Apple® or on Google Play.

Corrosion protection

Haier evaporators have a Blue Fin coating that protects the unit, with strong corrosion resistance and super hydrophilic performance.

R32 lower-impact refrigerant

Our air conditioning systems use a next-generation R32 refrigerant, which efficiently carries heat and has a lower environmental impact than R410A.

Large fans, low sound level

Quieter operation is achieved by our industry-leading 550mm fan and a unique outlet grille that offers less resistance to airflow.

Competitor Fan Grille

Haier Fan Grille

Handles for easier transport

Each outdoor unit is designed with four handles, allowing two people to carry it.

HIGH STATIC DUCTED

The Smart Power high static ducted indoor unit delivers powerful heating and cooling to every room, installed hidden in the ceiling cavity or under the floor for an uninterrupted interior.

Wi-Fi compatible with the optional accessory (KZW-W003).

FEATURES AND BENEFITS

Serviceability

Top, bottom or side panels are removable for servicing and installation (10.5–16kW).

Backup drain tray

High static indoor units are designed to incorporate two drain trays for condensate removal. The secondary tray is a backup in case the first one overflows due to a blockage.

Compact dimensions

The high static indoor unit (10–15.5kW models) has a compact chassis, designed to fit in small ceiling spaces and between standard roof truss spacings of 600mm.

10-step ESP adjustment

External static pressure (ESP) can be adjusted using the controllers, YR-E17A or YR-E16B. No need to open the electrical box and adjust by switch or plug, reducing installation time.

Two-piece design

For easier installation, the 20 and 24kW indoor units can be separated into two manageable pieces. The single unit can then be reassembled in the ceiling.

DC fan motor

DC fan motors are renowned for using less energy than a standard AC motor. They are also highly adjustable for better airflow and static pressure tuning.

LOW PROFILE DUCTED

The Smart Power low profile ducted indoor unit is designed for adaptable installation in shallow spaces, such as between levels in multistorey buildings, for precise temperature control across multiple rooms.

Wi-Fi compatible with the optional accessory (KZW-W003).

FEATURES AND BENEFITS

Consistent airflow

The indoor units can contain up to three fans to provide consistent airflow for different ductwork installations. Haier testing has proven no loss of airflow at increased static pressure installations.

High-lift drain pump

Designed with a quality built-in condensate pump that can lift water up to 750mm, for flexible installation.

Left or right drain outlet

In addition to the pump drain outlet, two gravity drain connections are provided, one on the left and one on the right.

Accessible wiring

A 45° panel allows easy unscrewing for better access to wiring.

Return air choices

Clever design allows the rear return air to be easily converted to bottom return air, along with the supplied air filter, to suit the installation.

Super slim

The unit is designed with a super low height of 250mm to fit into shallow spaces where a ducted system would otherwise not be suitable.

ROUND WAY CASSETTE

With a DC fan motor and unique round way air outlet, the Smart Power round way cassette indoor unit delivers 360° airflow to reach every part of the room.

Wi-Fi compatible with the optional accessory (KZW-W003).

FEATURES AND BENEFITS

Fresh air inlet

A pre-set fresh air inlet can introduce the outside fresh air into the room to improve the indoor air quality.

High-lift drain pump

The built-in condensate pump can lift water up to 1000mm.

Individual louvre control

The four louvres can be controlled individually using the supplied controller for maximum comfort throughout the room.

Round flow air supply

Air supply in all directions to improve air distribution.

Traditional four-way airflow

New round way airflow design

Hidden LCD Display

Discreet LCD display design shows green for cooling and red for heating.

Nominal condition: as per AS/NZS3823.2
Indoor temperature (cooling): 27°C DB / 19°C WB; indoor temperature (heating): 20°C DB
Outdoor temperature (cooling): 35°C DB / 24°C WB; outdoor temperature (heating): 7°C DB / 6°C WB

CONTROLS

Controller, YR-E17A

- Touchscreen display with backlight
- Clock, 24-hour timer
- On/Off, Mode, Fan speed, Temperature setting, Swing
- Individual and group control (max. 16 indoor units)
- Static pressure setting
- Humidity sensor with humidity display
- Infrared receiver for wireless controller

Controller, YR-E16B

- Large colour LCD display with touch buttons and backlight
- Clock, weekly timer
- On/Off, Mode, Fan speed, Temperature setting, Swing
- Individual and group control (max. 16 indoor units)
- Static pressure setting

Remote Controller, YR-HRS01 and Infrared Receiver, RE-02

- Optional remote control for ducted systems
- Requires a wired receiver, YR-HRS01

Remote Controller, YR-HBS-01

- Supplied with Round Way Cassette
- Large display and buttons for easy use
- Temperature setting of 0.5 degree increments
- Individual cassette louvre control

CONTROLS

Wi-Fi Accessory, KZW-W003

- Wi-Fi control
- Free download of the app, compatible with Apple and Android
- Weekly timer
- Connect multiple units

Central Controller, HC-SA164DBT

- Individual and group control (max. 64 indoor units)
- 5" TFT colour touchscreen
- Weekly schedule control
- Compatible with MRV, Smart Power, Super Match and HRV

Central Controller, YCZ-A004

- Individual and group control (max. 256 indoor units)
- 7" colour touchscreen
- Schedule control
- Compatible with Smart Power, MRV and hi wall split systems with the required accessories

SmartZone Controller, HW-ZA101DBT

- Flexibility to switch on and off up to eight zones
- Customisation of zone name settings
- Backlit display
- Weekly timer
